1.1 Wall supply air diffuser

1.1.1 Wall supply air diffuser type BKZ

Side-wall supply air diffusers for offices and residential areas requiring even air diffusion and the minimum possible temperature gradient.

The diffuser consists of a perforated steel diffusion plate (powder coated RAL 9010) and individual jet elements from ABS. The diffuser can be supplied either with a circular spigot for direct duct connection or with springs for fixing to a plenum box.

By varying the arrangement of the individual jets, different throws and air patterns can be achieved.

Sizes available

Supplied with plenum box (front face with rectangular perforations)

Supplied with connection spigot (front face with circular perforations)

Finish

Face plate finished to RAL (other than RAL 9010)

Air flow rate l/s or m³/h

Max. noise level NR or dB(A)

Max. pressure loss Pa
